TO OUR FRIENDS AND PATRONS:

Fifty-two years ago the founder of the Fruitland Nurseries issued its first catalog and began, with twenty acres planted in nursery stock, what has now evolved into the largest commercial nursery of the middle South, and where a larger line of products are grown than in any similar southern establishment.

The Fruitland Nurseries are located west of and adjoining the limits of the city of Augusta, Georgia, on the Washington road, a continuation of Broad street, 1½ miles from the terminus of the Lake View electric car line. In the home tract are soils of every texture found in this section of the state, thus enabling us to produce trees and plants under the most favorable conditions. In addition to the above area, we have a 240-acre farm ten miles from the home tract. 100 acres of this new land is now planted in nursery stock. Each department of our nursery is in charge of a competent foreman, and special care is, therefore, secured in its management.

We shall always strive to deserve the confidence of our customers.

We have over 460 acres in nursery stock, 30 acres in test grounds and trial orchards, and over one acre under glass. The stock of trees and plants offered in this list is in a most thrifty condition and is first-class in every respect.

We do not grow inferior or cheap-grade trees and plants. It is our aim to send out nothing but the best both in quality and variety. We invite a personal inspection of our stock.

Our shipping facilities are first-class, Augusta being the terminal point of seven lines of railroads and two lines of steamers on the Savannah river.

We have no connection whatever with any other nursery.

Our responsibility extends only to persons purchasing direct from us. **Dealers** purchasing from us sell upon their own responsibility.

While we exercise the greatest care to have all our trees and plants true to name, well grown, and packed in the best possible manner, and hold ourselves in readiness, on proper proof, to replace all trees or plants that may accidentally prove untrue to label, free of charge, or refund the amount paid therefor, it is mutually understood and agreed to between the purchaser and ourselves that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees or plants that prove untrue. **All orders are accepted upon the above conditions.**

TERMS OF SALE

PRICES.—This list cancels previous offers and the prices quoted are net and not subject to discounts.

We reserve the right to advance the prices without notice.

Orders for less than 400 trees or plants of a class will be billed at 100 rate; when 400 are ordered, prices will be at rate per 1,000; 40 at 100 rate; 5 at 10 rate.

In no case will long lists of selected varieties be supplied, two or three of either fruit or ornamental trees or plants, etc., to nurserymen or dealers at wholesale rates, but a discount of 25% from retail single prices is allowed on such lists.

Packing Charges at cost. Case from 8 to 10 feet long by 30 inches, $2.50; 8x2 feet, $2.00; 8 feet by 16 inches, $1.50; other sizes in proportion. Bales, 25 cents to $1.00, according to size. **Palms and other Greenhouse Plants packed free.**

Terms of Payment.—Cash with order, or satisfactory reference before shipment; or, if preferred, will ship goods with bill of lading attached to sight draft, through express or bank. On all C. O. D. orders we require 25% of the bill remitted before shipment.

All quotations are for immediate acceptance, subject to stock being sold. No liability to attach to us where frost, drought or other casualties beyond our control prevent delievry of stock that may be contracted for.

Claims.—All claims for errors must be made upon receipt of goods. Should any error occur at any time, we desire to be informed at once, in order to rectify the same without delay.

When ordering, please give plain and explicit directions as to route and manner in which goods are to be forwarded. Give name of express office or railroad which you prefer. When routing is left to our judgment, we will select the best route, but in no case will we assume any responsibility for safe delivery of goods after proper shipment by us. All goods travel at purchaser's risk. Claims for delay or loss must be made to the forwarders.

NOTE—No shipments made at the 3-cents per pound valuation unless we are so instructed by our customers; if not so instructed, all shipments will go at the open rate.

Frotscher. Very large; 45 to 50 to the pound; shell thin; fine quality.

Jerome. Originated in Louisiana and is a seedling of Pride of the Coast. It is far superior to the parent, the tree being very healthy and of vigorous growth; nut very large, shell of about the same thickness as Pride of the Coast; good cracking quality, well filled. Will run from 30 to 50 to the pound. For a number of years we have inadvertently sent out this Pecan under the name of Pride of the Coast. This Pecan is unquestionably a very superior variety, and, when it is better known, will become one of the standard sorts.

Stuart. Large, 2 in. long by ¾ in. in diameter; thin shell; quality good; heavy bearer.

Van Deman. Large, 45 to 50 to the pound; shell thin; quality good.

ORNAMENTAL DEPARTMENT

DECIDUOUS SHRUBS

This year our Deciduous Shrubs both in quantity and quality are better than ever before offered. The larger sizes have been several times transplanted. We give plenty of space in the rows, therefore our shrubs are stocky, and the plants. as offered, should not be confused with those which have been grown in crowded rows.

ALTHAEA MEEHANII.

ALTHAEA (Hibiscus Syriacus). ROSE OF SHARON—

Standard Althaeas. Best single and double, in 25 sorts.

	10	100	1000
3 to 4 feet, grafted, heavy, well branched	$1.50	$12.00	$80.00
2 to 3 ft., grafted, heavy, branched	1.00	8.00	70.00

MEEHANII (Hibiscus Syriacus Meehanii).

New Variegated-leaved Althaea. This most remarkable Althaea is unqestionably the best of the variegated-leaved class. Habit robust, compact and somewhat dwarf-growing; leaves beautifully variegated with creamy white, with irregular margins and green centers. The light-colored parts never sunscald or revert to the original green. Flowers single, 3½ to 4 inches in diameter, of a satiny lavender sheen, and purple-blotched at the base of each of the five petals; produced in the greatest profusion from June 1 until autumn.

It is a remarkably striking plant. Nothing finer can be found during its blooming period, or even previous to the time the flowers make their appearance, and it is most excellent for massing or as single specimens.

It has proven hardy as far north as the other varieties of Althaeas thrive. Plants now 25 years old in our grounds have reached a height of 8 feet and have always been free from insects or disease.

As compared with the old variegated-leaved variety, known as **Althaea Buistii (Hibiscus Syriacus Buistii,** or **H. variegata),** whose double, dark wine-colored flowers never open, and remain unsightly, the Meehanii is immensely superior.

This variety was received by us about twenty-five years ago with an invoice of other deciduous shrubs, and merely labeled "Variegata." But is proved to be entirely distinct from what was known under that name, and its merits soon became so transcendent that, after submitting leaves and flowers for identification to our esteemed friend, the late Thomas Meehan, who was unable to trace its origin, we dedicated it to him.

We do not hestitate to offer this plant to the trade, feeling sure that it will be universally valued as soon as it is disseminated.

2 ft., partly branched, transplanted	2.00	18.00

We offer the finest lot of **Magnolia grandiflora** we have ever grown. All have been grown one year in pots before being planted in open ground. This has given the plants a fine root system, and they must not be confused with the ordinary field-grown Magnolias.

All Magnolias from open ground will be defoliated before shipping, as this lessens the liability of loss from transplanting; and unless ordered to the contrary, open-ground Magnolias will be shipped without leaves.

CONIFEROUS EVERGREENS

We can justly claim that we grow the largest and most varied stock of Coniferous Evergreens in the Southern States, and especially of such varieties as are best adapted to this climate. We also grow many of the hardy varieties which are adapted to the East and West. Our collection of Biotas, Cupressinae, Junipers, etc., contains many valuable and rare sorts. All of our open ground Conifers have been several times transplanted. Others are grown in open ground, lifted in early fall and potted, thus having a beautiful root system. All plants are shipped with a ball of earth around the roots same wrapped in burlaps and moss.

Biota Aurea Nana. Berckmans' Golden Arborvitae. Without a doubt this is the best dwarf golden Arborvitae ever introduced. As shown in photograph, it is of very dwarf and compact habit—a perfect gem for small gardens, window-boxes, urns and vases. It is far superior to the old Biota aurea, and can stand a lower degree of temperature. We have over 10 acres of this Conifer, of various sizes, in stock this season. The four smaller sizes can be safely shipped without the roots being balled. This can be done as soon in the fall as we have sufficient cold weather to thoroughly check the growth of the plants. When plants are shipped without being balled, deduct 5 cents per plant from prices quoted below:

CITRUS FRUITS

ORANGES, LEMONS and POMELOS

Our Citrus Fruits are budded upon **Citrus trifoliata**, this stock being particularly desirable for the colder regions of the orange belt. Trifoliata stock does not materially dwarf the trees when set in open ground, but the trees have a tendency to branch near the ground, thus making beautiful, low-headed trees; it increases the productiveness and also advances the time of bearing and can resist a lower degree of cold than when budded upon the sour stock.

These plants are also most desirable for greenhouse and conservatory cultivation. The plants offered are extra stocky and well branched. The trees fruit when two years old. We can confidently recommend these plants. All have bushy heads.

NO SCALE OR DISEASE

Our Nurseries are inspected annually by the State Entomolgist. A certificate of said inspector is attached to every package that leaves our establishment.

FUMIGATION

We fumigate our stock with hydrocyanic acid gas before shipping, as required by State law, so that assurance of freedom from insects or disease of any kind is made doubly sure.
